OPERATION GUIDELINES

1. Filling water

- The capacity of filled water is limited by the ultimate line graduated on the water level scale. It should not be higher than the max line, nor lower than the minimum line.
- On filling water, care should be taken to avoid watercolumn flowing on the kettle,s outside surface.

2. Locating

- Place the kettle on a sitable flat surface.
- Never heat the kettle on any wet surface, do not allow water to penetrate the electrical parts inside the kettle.
- Do not position the kettle on or near hot surface or near open flames.

3. Switching on

- Insert the main plug on the power cord into the wall socket.
- Please take care that the power cord must be well located and can not caught on by a passerby.
- Push the restoring switch on
- The red indicator lamp brights. It indicates that the kettle is in heating.

4. Boiling

- The kettle is automatically switch off several seconds after the water is boiling.
- The red indicator lamp goes out as switch off.

5. Restoring

- After the kettle has switched off, it will take about 15 mins to cool down and the kettle can be switch on again by manual restoring.
- If the red indicator lamp still goes out after pushing the restoring switch.It may be the case that the temperature sensing controller is still in hot condition and time must be taken for re-operating the kettle.

FEATURE

1. Immersed heating tube with a stainless stell plate under it.
2. Water level scale in metric & English systems and limit marks.
3. Three levels of appliance protection.
 - a) Temperature sensing controller-automatic switch-off when water is boiling.
 - b) Dry boiling protector-boil-dry safety cut off
 - c) Thermal fuse cut off the circuit if dry boiling protector fails.
